Those who invented the law of supply and demand have no right to complain  
 when this law works against their interest.  
 -- Anwar Sadat

Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*Q: How many mathematicians does it take to screw in a lightbulb?  
A: One. He gives it to six Californians, thereby reducing the problem to the earlier joke.*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
