Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*The very powerful and the very stupid have one thing in common. Instead of altering their views to fit the facts, they alter the facts to fit their views... which can be very uncomfortable if you happen to be one of the facts that needs altering.
-- Doctor Who, "Face of Evil"*

It is one thing to pilfer fine-tuned steel, and another to take a pound of literary old iron, and convert it in the furnace of one's own mind into a hundred wicksprings, worth each a thousand times as much as the iron. When genius borrows, it borrows grandly, giving to the borrowed matter, a life and beauty it lacked before.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
