Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*Little girls, like butterflies, need no excuse.  
-- Lazarus Long*

*How do you spot a leader? They come in all ages, shapes and conditions. Some are poor administrators, some are not overly bright. One clue: the true leader can be recognized because somehow his people consistently turn in superior performances.  
-- Robert Townsend*

God made the world in six days, and was arrested on the seventh.

One of the oldest problems puzzled over in the Talmud is: "Why did God create goyim?" The generally accepted answer is: "so man would have to buy retail."  
-- Arthur Naiman

Gravity is a myth, the Earth sucks.

You will discover that you are actually from a small planet somewhere in the vicinity of Betelgeuse, and not from Guildford as you have hitherto claimed.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
