Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

A citizen of America will cross the ocean to fight for democracy, but won't
 cross the street to vote in a national election.
 -- Bill Vaughan

If you wish to make a superior product, you must already be engaged in
 making an inferior product.
 -- Jacob A. Varela

"Inspiration arrives as a packet of material to be delivered."

"If I kiss you, that is a psychological interaction. On the other hand, if I hit you over the head with a brick, that is also a psychological interaction. The difference is that one is friendly and the other is not so friendly. The crucial point is if you can tell which is which."

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
