Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

A strong conviction that something must be done is the parent of many bad measures.
-- Daniel Webster

Never shrink from doing anything which your business tells you to do. The man who is above his business may one day find his business above him.
-- Drew

Do you realize how many holes there could be if people would just take the time to take the dirt out of them?

Paranoids are people, too; they have their own problems. It's easy to criticize, but if everybody hated you, you'd be paranoid too.
— D. J. Hicks

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
