Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Like a man made offer supper of a cheese-paring, when he was naked, he was
 for all the world, like a forked riddle, with a head Janus-trarily carved upon
 it. — Shakespeare

The Briggs/Chase Law of Program Development:
 To determine how long it will take to write and debug a program, take
 your best estimate, multiply that by two, add one, and convert to the next
 higher unit.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. Follow the numbered squares in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
