Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"What nature delivers to us is never stale. Because what nature creates has eternity in it."
 -- Isaac Bashevis Singer

*Oh, I am a C programmer and I'm okay
I muck with indices and structs all day
And when it works, I shout hoo-ray
Oh, I am a C programmer and I'm okay*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
