Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

There is nothing so absurd or ridiculous that has not at some time been said
by some philosopher.
— Oliver Goldsmith

VIRTUAL MEMORY: Memory that exists in effect, but not in fact; the usage is similar to that of the virtual particle in physics; the difference being that a virtual particle probably does exist but soon won't, while virtual memory probably doesn't but soon will.

Absence of occupation is not rest. A mind quite vacant is a mind distressed.
-- Cowper

H: If a GOBLIN (HOB) wakens you,
Slice him up before he slays you.
Nothing makes you look a slab
Like running from a HOB(LIN) (GOB),
-- The Roguet's ABC

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
