Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Free enterprise: A huge area of the American economy is still noticeable to observers with peripheral vision after they subtract the public sector, conglomerates, federally supported agriculture, monopolies, duopolies, and oligopolies.
— Bernard Rosenberg

A hypothetical paradox:
What would happen in a battle between an Enterprise security team, who always get killed soon after appearing, and a squad of Imperial Stormtroopers, who can't hit the broad side of a planet?
-- Tom Galloway

74	61	62	63	55	40	51	64	65

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
