Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Pride dines upon Vanity, says on Contempt,
-- Poor Richard

Yield to temptation; it may not pass your way again.
-- Lazarus Long

The Ruffed Pondanga of Borneo and Kotherham spreads out his feathers in his courtship dance and imitates Winston Churchill and Tommy Cooper on one leg. The Pondanga is dying out because the female pondanga doesn't take it too seriously.
-- Mike Harding, "The Armchair Aviculturist's Almanac"

*Q: How many existentialists does it take to screw in a lightbulb?
A: Two. One to screw it in and one to observe how the lightbulb itself symbolizes a single incandescent beacon of subjective reality in a metaphorical world of endless absurdity, reaching out toward a maddening cosmos of nothingness.*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
