Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Oh, I am a C programmer and I'm okay
 I muck with indices and strings all day
 And when it works, I shout Ho-roy
 Oh, I am a C programmer and I'm okay

When a fly lands on the ceiling, does it do a half roll or a half loop?

Defeated, but not dismayed -- crushed to the earth, but not humiliated -- he seemed to grow more laughing beneath disaster, and to experience a fierce satisfaction in draining the last drops of bitterness.
-- Washington Irving

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
