Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

I don't care how poor and inefficient a country is: they like to run their own business. I know men that would make my wife a better husband than I am; but, damn it, I'm not going to give her to em.
 -- Will Rogers

The contest for ages has been to rescue liberty from the grasp of executive power.
 -- Daniel Webster

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
