Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Age is a tyrant, who forbids, at the penalty of life, all the pleasures of youth.
-- La Rochefoucauld

The Law of the Too, Too Solid Point: In any collection of data, the figure that is most obviously correct -- beyond all need of checking -- is the mistake.

Microwave oven? Whaddya mean, it's a microwave oven? I've been watching Channel 4 on the thing for two weeks.

He was so narrow-minded he could see through a keyhole with two eyes.

You look like a million dollars. All green and wrinkled.

If you can lead it to water and force it to drink, it isn't a horse.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
