Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Children are unpredictable. You never know what inconsistency they're going to catch you in next.
-- Franklin P. Jones

In Dr. Johnson's famous dictionary, patriotism is defined as the last resort of the scoundrel. With all due respect to an enlightened but inferior lexicographer, I beg to submit that it is the first.
-- Ambrose Bierce

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
