Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Read a good book.

*Q: How many existentialists does it take to screw in a lightbulb?
A: Two. One to screw it in and one to screw in the lightbulb itself. Symbols of a nihilistic and senseless world, the existentialists are ready in a netherworld of endless obscurity, reaching out toward a madman's cosmos of nothingness.*

Whenever two hypotheses cover the facts, use the simpler of the two.

"What nature delivers to us is never stale. Because what nature creates has eternity in it."
-- Isaac Bashevis Singer

14	81	76	8	13	9	10	11	2
42	60	55	7	20	21	70	71	3

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use. Put the numbers in the order listed in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
