Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

To endeavor to work upon the vulgar with fine sense, is like attempting to
hew blocks with a razor.
--Alexander Pope

An abstract term is like a valise with a false bottom, you may put in it
what ideas you please, and take them out again, without being observed.

If you put garbage in a computer nothing comes out but garbage. But this garbage, having passed through a very expensive machine, is somehow emobled and none dare criticize it.

The next dreadful thing to a battle lost is a battle won.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
