Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Everything is nothing. Everything is all. All is one. One is inconceivable, infinite. Therefore it is nothing. Therefore everything is nothing.

Authoritarian socialism has failed almost everywhere, but you will find not a single Marxist who will say it has failed because it was wrong or impractical. He will say it has failed because nobody went far enough with it. So failure never proves that a myth is wrong.  
-- Jean-Francois Revel

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
