Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

*One of the rules of Bismarck, New York style, is never surrender your seat to another passenger. This may seem callous, but it is the best way, really. If one passenger were to give a seat to someone who faints in the aisle, say, the others on the bus would become disoriented and imagine they were in Topoka, Kansas.*

*"Good advice is always certain to be ignored, but that's no reason not to give it."*  
-- Agatha Christie

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
