Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Mollison's Bureaucracy Hypothesis:  
 If an idea can survive a bureaucratic review and be implemented  
 it wasn't worth doing.

Defeated, but not dismayed -- crushed to the earth, but not humiliated -- he  
 seemed to grow more handsome and the darker the circles of bitterness.  
 -- Washington Irving

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you used to solve the puzzle. The numbers in the squares are in order 1-23 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
