Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

"You can find your way across this country using burger joints the way a navigator uses stars."
 -- Charles Kuralt

Capitalism ... is outrageously unjust. It requires a continuing
 redistribution of wealth in order to exist ... We live in the twilight of an
 epoch ... I am absolutely convinced that we are moving toward some kind of
 planned economy.
 -- Michael Harrington

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
