Atoms are made up of electrons and protons (protons are also neutrons). Fifty billion electrons piled side by side in a straight line would stretch across the planet Earth. The mass of the electrons in the planet is less than the mass of the planet. Such an idea is incapable of being absorbed by the human mind.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use. Put the numbers in the order listed in order 1, 2, 3 until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
