Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Philosophy will clip an angel's wings.
--John Keats

The hardest thing is to disguise your feelings when you put a lot of relatives on the train for home.

For the rule of the wise over the less wise to be advantageous ... it must
 come about by a process of consent. And the requirement of consent can be
 understood only in the light of, and by recognition of, natural equality.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
