Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

A sine curve goes off to infinity or at least the end of the blackboard
-- Prof. Steiner

Gold: A soft malleable metal relatively scarce in distribution. It is mined deep in the earth by poor men who then give it to rich men who immediately bury it back in the earth in great prisons, although gold hasn't done anything to them.
-- Mike Harding

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3,... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
