Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

If nuclear... therefore it must be bad. Denounce such power with a protest
 squeal. The scientists made it (surely they're all mad). It's better not to
 think and just to feel.
 -- Jack Kinwan

Love is merely madness; and I tell you, deserves as well a dark house and a whip, as madmen do; and the reason why they are not so punished and cured, is that the lunacy is so ordinary, that the whippers are in love too. -- Shakespeare

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
