Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

The dotted lines indicate areas which also contain a non-repeating set of digits. These squares can be added together to produce the sums shown in the clues.

Be sure to use the answers page if you get stuck!

Experience is the worst teacher. It always gives the test first and the instruction afterward.

We've sent a man to the moon, and that's 29,000 miles away. The center of the Earth is only 4,000 miles away. You could drive that in a week, but for some reason, nobody's ever done it.
—Andy Rooney

55	56	15	12	3	4	40	41	13

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
