Krypto Kakuro puzzles are a mash-up between a Crossword, a Sudoku and a Cryptogram.

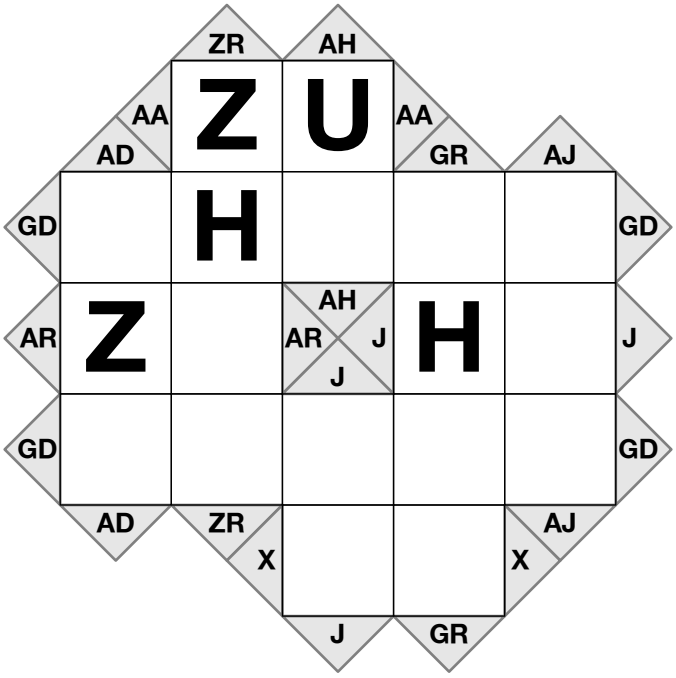

Each digit has been substituted with a letter. To solve the puzzle, you must figure out what digit each letter stands for, and then solve it like a regular Kakuro puzzle.

Each "word" in the crossword contains only the digits 1 through 9, and the same digit will *never* repeat within a word. The sum of the the digits of each word are shown on the left and right sides of "across" words, and at the tops and bottoms of "down" words.
