Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

If you've already donated, thank you so much!
My family and I really appreciate your support.

The other can collided with mine without giving warning of its intentions.

A sentence well couched takes both the sense and the understanding. I love
 not those car-t-ropes speeches that are longer than the memory of man can
 follow.
 --Fletcher

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
