Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

If you've already donated, thank you so much! My family and I really appreciate your support.

For 40 years I have analyzed stocks and other money markets. Now I have made a remarkable discovery: The Confederate dollar has risen in value 7.4 percent a year since 1905. It has outperformed the German mark, the Japanese yen and the Swiss franc.
-- Vincent W. Allen

44			30		31	45	32	33
34	20			23			1	15
35	6	4	2		36			5
17	52	9	11	24	37	46		
		10		19	25	26		14
21	53			7	18	12		47

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
