Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

Nostalgia isn't what it used to be.

The capacity of human beings to bore one another seems to be vastly greater than that of any other animals. Some of their most esteemed inventions have no other apparent purpose, for example, the dinner party of more than two, the epic poem, and the science of metaphysics.
--H. L. Mencken

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
