Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

If life were a bed of roses, some people wouldn't be happy until they developed an allergy.

*In Riemann, Hilbert or in Banach space,
Let superscripts and subscripts go their ways,
Let supscripts be on top and subscripts be on the
bottom, and you will find the answer.
We ship our puzzles to Stanislaw Lem, "Cyberiad".*

	14	34	15	35	16			
36	17				18		37	
38		39	19		20	21		
22	23	40		24				

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
