Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

KrazyDad's puzzle website is maintained with the help of your generous donations.

As good almost kill a man, as kill a good book; who kills a man, kills a reasonable creature, God's image; but he who destroys a good book, kills reason itself.
 -- Milton

The life expectancy of a television comedian is proportional to the total amount of exposure on the medium.

Work Rule: Entirely too much time is being spent in the washrooms. In the future, you will follow the practice of going in alphabetical order. For instance, those whose surnames begin with 'A' will be allowed to go from 9:05 AM and so on. If you are unable to go at your appointed time, it will be necessary to wait until the next day when your time comes around again.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
