Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

The order and connection of ideas is the same as the order and connection of things.

*A recent study has found that concentrating on difficult off-screen objects, such as the faces of loved ones, causes eye strain in computer scientists. Kester Chen, from the University of Pennsylvania, and his colleagues conducted an experiment to see if a more natural, three-dimensional object...
make sense of such abstract three-dimensional objects...*

Arthur's Laws of Love:
 1. People to whom you are attracted invariably think you remind them
 2. The love letter you finally send will be delivered in the mail long enough for you to make a fool of yourself in person.

	17	18		8				9
29	30	31		32			33	

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
