Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

In the education of children there is nothing like alluring the interest and affection; otherwise you only make so many asses laden with books.
-- Michel de Montaigne

If an author write better than his contemporaries, they will term him a plagiarist; if as well, a pretender; but if worse, he may stand some chance of commendation as a genius of some promise, from whom much may be expected by a due attention to their good counsel and advice.
-- Colton

50		51	5		6			19
	43	44			7	27	8	28

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
