Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

*I'm going to live forever, or die trying!
-- Spider Robinson*

You or I must yield up his life to Ahrimanes. I would rather it were you. I should have no hesitation in sacrificing my own life to spare yours, but we take stock next week, and it would not be fair on the company.
-- J. Wellington Wells

Some people are quick to criticize cliches, but what is a cliché? It is a truth that has retained its validity through time. Mankind would lose half its hard-earned wisdom, built up patiently over the ages, if it ever lost its cliches.
 -- Marvin G. Gregory

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
