Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

Offences ought to be pardoned, for few offend willingly, but as they are
-- Hegesippus

People rarely succeed at anything unless they have fun doing it.

In any organization, the potential is much greater for the subordinate to manage his superior than for the superior to manage his subordinate.

Do you think your father and I should have lived comfortably so long together if ever we had been married?

		3	55	51			1	2
21	22		4	9		19		
25		23	17	6	5		18	7

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
