We lie about the truth, that's what ruins us here. And do you know why we lie about the truth? Not because we like to, but because we are scared to death of it. If we looked the truth in the eye nine out of ten of us would run to the graveyard and demand to be buried at once.

The value of money has an objective regulator only when it is linked to a real commodity, like gold, itself requiring the cost of human labor to be produced. By comparison, the value of inconvertible paper money has no objective regulator, its marginal cost of production being nearly zero.

The Diddle factor changes things so that the equation and the universe appear to fit, without requiring any real change in either. This has the characteristic of eliminating differences by dropping the subject under discussion to zero importance.
