Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

## Sudoku #2

3	8		4	1				
				9				
4	5		6					7
	4					7		2
		8				9		
2		6					4	
1					2		9	3
				4				
				7	5		6	1

*Yes, but every time I try to see things your way, I get a headache.*

*Important letters which contain no errors will develop errors in the final. Corresponding errors will show up in the duplicate while the Boss is reading it.*

The nice thing about standards is that there are so many of them to choose from.  
-- Andrew S. Tanenbaum

Don't let the fact that you can't do all you want to do keep you from doing what you can do.

	27		52	43	18		4	14
21	22			5	23	8	11	19

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
