Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

Wait to help me replace my broken pencil sharpener?

If a political candidate chooses to go into specifics on a program that affects a voter's self-interest, the voter gets interested. If the proposal involves money, he gets very interested.
-- Stuart Spencer

You can fool the people about many things, but only a fool would be foolish enough to fool the people about money.
-- Italo Bombolini

No man is so foolish but he may sometimes give another good counsel, and no man so wise that he may not easily err if he takes no other counsel than his own. He that is taught only by himself has a fool for a teacher.
-- Ben Johnson

	45	38		39		27	22	
	46		1	40		41	28	

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
