Fill in the blank squares so that each row, each column and each 3-by-3 block contain all of the digits 1 thru 9.

If you use logic you can solve the puzzle without guesswork.

Need a little help? The hints page shows a logical order to solve the puzzle. Use it to identify the next square you should solve. Or use the answers page if you really get stuck.

"... the Mayo Clinic, named after its founder, Dr. Ted Clinic ..."
-- Dave Barry

It is better to wear out than to rust out.

For specialization is a process that begins as an attempt to develop experts who will then inform the whole body. It can end, however, and sometimes does, in the removal of any inclination to question the supposed "experts" -- who themselves are sometimes not all that expert. -- Michael Scully

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
