Productivity = (Number of secretaries X Average typing speed) / (Number of scientists). Note that when the number of scientists is zero, productivity becomes infinite.
-- Robert Sommer

12	55	24		53		23		54

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
