We use an amalgam of mercury in modern dentistry because other metals, by themselves, are not sufficiently malleable to be worked with at the normal temperatures inside the human mouth. But mercury -- mercury is just walkin' around, right??
-- Mike the Dentist

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
