Atoms are made up of electrons and protons (protons are also nothing). Fifty billion electrons placed side by side in a straight line would stretch across the period at the end of this sentence. Protons are heavier but take up less space. Such an idea is incapable of being absorbed by the human mind.

-- John Lardner and Thomas Sugrue

As with most fine things, chocolate has its season. There is a simple memory aid that you can use to determine whether it is the correct time to order chocolate dishes: any month whose name contains the letter A, E, or U is the proper time for chocolate.
