If you put tomfoolery into a computer, nothing comes out but tomfoolery. But this tomfoolery, having passed through a very expensive machine, is somehow emboldened, and no one dares to criticize it.

Oh, I am a C programmer and I'm okay
I muck with indices and structs all day
And when it works, I shout hoo-ray
Oh, I am a C programmer and I'm okay

Man is forbidden to eat from the tree of knowledge of good and evil. He acts
against God's command... From the standpoint of the Church, which represents
authority, this is essentially sin. From the standpoint of man, however, this
is the beginning of human freedom.
-- Erich Fromm

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
