Perfect happiness, I believe, was never intended by the Deity to be the lot of one of His creatures in this world; but that He has very much put in our power the nearness of our approach to it, is what I have steadily believed.

In a bureaucratic system an increase in expenditure will be matched by a fall in production. Such systems will act rather like 'black holes' in the economic universe, simultaneously sucking in resources and shrinking in terms of size.

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
