From the Greek "poly" ("many") and the French "tete" ("head" or "face," as in "tete-a-tete": head to head or face to face). Hence "polyteten", a person of two or more faces. -- Martin Pitt

*Come, let us hasten to a higher plane,
Where dvads tread the fairy fields of Venn,
Their indices bedecked from one to n ,
Commungled in an endless Markov chain!*

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1, 2, 3, ... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
