*The capacity of human beings to love one another seems to be vastly greater than that of any other animals. Some of their most essential attributes lie in the ability to cooperate and to help one another, in a way that goes far beyond the selfishness of most other species.*  
-- H. L. Mencken

INSTRUCTIONS: These hint grids reveal the order in which the squares were solved by my computer. It's not necessarily the same order you would use, but it's probably close. Follow the numbered squares in order 1,2,3... until you find a square you haven't solved yet. This square (or the one or two immediately after it) is a good candidate to solve next.
