## STUPENDOUS SUGURU

These puzzles are a sample from my book, *Stupendous Suguru*, *Volume 1*, available on Amazon.

In this book, all the Suguru are subdivided into a grid of 15 by 20 cells (a cell is an individual square which holds a single digit). The cells are grouped into containers, with thicker borders, each of which is one to five cells in size (most are five). You need to fill each container with unique digits, counting up from 1. So, for example, a two-cell container always contains the numbers 1 and 2. A five-cell container contains each of the numbers 1 through 5. Adjacent (touching) cells may never contain the same number, and this includes diagonally adjacent cells. That's it for the rules!

Like all my puzzles, every puzzle in this booklet has only one unique solution.
